NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The accompanying statutory financial statements of General Reinsurance Corporation (the "Corporation") have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners' ("NAIC") Annual Statement Instructions and Accounting Practices and Procedures Manual, version effective as of March 2022, except as otherwise prescribed or permitted by the laws of the State of Delaware.

On August 11, 2020, the Corporation received approval from the State of Delaware Department of Insurance (the "DE DOI") to exceed certain prescribed investment limitations by an additional, up to five percent pursuant to §1305(6) of the Delaware Code. The approval allows the Corporation to hold one specific common stock in excess of the ten percent of admitted assets aggregate limitation per §1305(1) and in excess of the three percent of admitted assets cost-basis limitation per §1305(2). The Corporation's investment represents 11.5% and 5.4% of the respective aggregate and cost-basis limitations.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts included in these statutory statements. Actual results could differ from those estimates. The Corporation's principal estimates include property / casualty losses and loss adjustment expenses, as well as estimated premiums, where the Corporation has not received ceding's reports. The Corporation utilizes historical information, actuarial analyses, financial modeling, and other analytical techniques to prepare these estimates.

C. Accounting Policy

Premiums are earned over the terms of the related reinsurance contracts or insurance policies. Premium adjustments and contingent commissions on retrospectively rated contracts are recognized in the periods in which the related losses are incurred. Unearned premium liabilities are established to cover the unexpired portion of premiums written. Such liabilities are computed by pro rata methods based on statistical data and reports received from ceding companies. Commissions and other acquisition costs related to premiums written are expensed at the time the premiums are written.

The liability for unpaid losses and loss adjustment expenses is based on reports and individual case estimates received from ceding companies and is net of amounts recoverable from retrocessionaires. In addition, a liability is included for unpaid loss and loss adjustment expenses incurred but not reported ("IBNR"). The methods for establishing such estimates and resulting liabilities are reviewed quarterly and any adjustments resulting therefrom are included in income currently. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The liabilities also include a provision for environmental and latent injury claims.

Bonds and short-term investments are stated at amortized cost using the constant yield method, except those bonds not having an NAIC designation of 1 and 2, which are carried at the lower of amortized cost or fair value. Perpetual preferred stocks that are designated highest-quality or high-quality (NAIC designations 1 and 2, respectively) shall be reported at fair value; with all other perpetual preferred stock (NAIC designation 3 to 6) reported at the lower of cost, amortized cost, or fair value. Common stock of unaffiliated companies and derivatives are carried at fair value. Investments in affiliates are included in common stocks, based on the surplus value of the entity, determined in accordance with Statutory Accounting Principles ("SAP"). Adjustments relating to the revaluation of equity securities at each statement date are charged or credited directly to unassigned surplus as unrealized gains or losses. Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair value. The retrospective adjustment method is used to value loan-backed bonds and structured securities. Prepayment assumptions for loan-backed bonds and structured securities were obtained from broker-dealer survey values or internal estimates. These assumptions are consistent with the current interest rate and economic environment.

Realized capital gains and losses are determined on the basis of specific identification. Investment income is recognized as earned and includes the amortization of premium and accretion of discount relative to bonds acquired at other than their par value.

Included in other invested assets are investments in loans and limited partnerships. Limited partnerships are valued under the equity method of accounting, under which the Corporation's equity investment represents the original contribution and any subsequent contributions, appreciation or depreciation of the investment, and distributions from the venture or partnership.

The Corporation has not modified its capitalization policy from the prior period.

D. Going Concern

Management's evaluation of relevant conditions and events, considered in aggregate, indicate that the Corporation will be able to meet its obligations as they become due within one year following the date that these financial statements are issued.

D. Loan Backed Securities

(1) Prepayments assumptions for Mortgage-Backed Securities, Collateralized Mortgage Obligations and Other Structured Securities were generated using a purchased prepayment model. The prepayment model uses a number of factors to estimate prepayment activity including the time of year (seasonality), current levels or interest rates (refinancing incentive), economic activity (including housing turnover) and term and age of the underlying collateral (burnout, seasoning). On an ongoing basis, we monitor the rate of prepayment and calibrate the model to reflect actual experience, market factors, and viewpoint.

(2) No other-than-temporary impairments were recognized in 2022 and 2021.

(3) None

(4) The Corporation did not have any impaired loan backed securities for which an other-than-temporary impairment has not been recognized in earnings as of December 31, 2022.

(5) A review of investments is performed as of each financial statement date with respect to investments of an issuer where the market value is below cost. If in management's judgment, the decline in value is other-than-temporary, the cost of the investment is written down to fair value with a corresponding charge to earnings. Factors considered in determining whether impairment exists include: the financial condition, business prospects and creditworthiness of the issuer; the length of time that the asset has been less than the cost; and the Corporation's ability and intent to hold such investments until the fair value recovers. If a decline in value is solely attributable to changes in market interest rates, rather than fundamental credit problems with the issuer, impairment is deemed other-than-temporary when the Corporation has the intent to sell an investment, at the reporting date, before recovery of the cost of the investment.

- (2) The consolidated tax liability is allocated among affiliates in the ratio that each affiliate's separate return tax liability bears to the sum of the separate return tax liabilities of all affiliates that are members of the consolidated group. In addition, a complementary method is used which results in reimbursement by profitable affiliates to loss affiliates for tax benefits generated by loss affiliates.

G. Federal or Foreign Income Tax Loss Contingencies - None

H. Repatriation Transition Tax - None

I. Alternative Minimum Tax Credit - None

The Inflation Reduction Act ("IRA") of 2022 was enacted on August 16, 2022. The IRA includes a new Federal Corporate Alternative Minimum Tax ("CAMT"), effective in 2023, that is based on the adjusted financial statement income set forth on the applicable financial statement of an applicable corporation. The NAIC adopted Interpretation 22-02 to apply to December 31, 2022. Following that guidance, due to the Corporation joining in the consolidated federal income tax return by Berkshire Hathaway Inc. ("Berkshire"), it has been determined as of the reporting date that it will be an applicable corporation. The 2022 statutory basis financial statements do not include an estimated impact of the CAMT because a reasonable estimate cannot be made.

The GRAG LPT has an aggregate limit of \$9,967 million (175% of the initial loss reserves ceded). Consideration was equal to the reserves ceded (\$5,696 million) resulting in no gain or loss. The GRAG LPT was therefore accounted for as prospective reinsurance per

NOTES TO FINANCIAL STATEMENTS

The guarantee was effected through an amendment to the original lease of the property dated as of June 30, 2008. The Corporation includes the future non-cancelable rental payments in Note 15.

The Corporation had originally issued a guarantee with respect to the obligations of its affiliate General Reinsurance UK Limited (“GREL”) with respect to certain reinsurance contracts that GREL had entered into or renewed (“Guaranteed Reinsurance Contracts”). In connection with the transfer of the entire business of GREL to GRAG (“Transfer”), which was effectuated during 2010, the Corporation agreed to guarantee the payment of all amounts due and payable by GRAG under the Guaranteed Reinsurance Contracts on the same terms as were in place in the Corporation’s original guarantee to GREL for the business in-force as of the date of transfer and does not apply to new business written.

As a condition to the Connecticut Insurance Department granting approval of the dividend to the Corporation, of General Star International Indemnity Limited (“GSIL”) by its direct parent, GSIC, a Connecticut domestic insurer (at the time of the transaction), and a direct, wholly owned subsidiary of the Corporation, the Department required that the Corporation replace GSIC as the guarantor on a guarantee GSIC had entered into with respect to two policies that GSIL had issued. The parties complied with this condition and the GSIL dividend was effectuated in 2010. Ultimately, GSIL was contributed to Faraday Reinsurance Co. Limited, a U.K. affiliate of GSIL, in 2010.

On or about February 12, 2009, the German court registered the transfer resolution which has resulted in the Corporation acquiring the 100% ownership interest in GRAG.

As a result of the Corporation’s purchase of the remaining shares of GRAG, the Corporation owns 100% of GRAG, valued at \$4,692 million at December 2022, which exceeds 10% of admitted assets. 20. FAIR VALUE MEASUREMENTS

A. Fair value measurements at reporting date

Included in the Corporation's investment portfolio are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain bonds with ratings below investment grade, which are carried at the lower of cost or market.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The fair value of a liability is the amount at which that liability could be incurred or settled in a current transaction between willing parties, that is, other than in a forced or liquidation sale.

Fair values are based on values from an independent pricing service vendor. When market prices are not available a price may be obtained from a broker or fair value may be estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Corporation estimates fair value using methods, models, and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant when valuing increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

The Corporation's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100R - *Fair Value*. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads, and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Corporation's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

NOTES TO FINANCIAL STATEMENTS

4. Level 2 and 3 Valuation techniques & inputs used

Securities disclosed at fair value are determined based on NAIC valuation rules and typically consist of common and preferred equities, however, other securities may periodically be carried at fair value based on certain factors such as the NAIC's lower of cost or market rules. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Reliance is predominately on independent pricing service vendors that have been evaluated and approved by our pricing policy committee. Generally, pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor's evaluation process is used to determine the appropriate fair value hierarchy. Documentation from each pricing vendor is reviewed and monitored periodically to ensure they are consistent with pricing policy procedures. Market Information obtained from brokers with respect to security valuations is also considered in the price hierarchy.

21. OTHER ITEMS

A. Unusual or Infrequent Items

The outbreak of COVID-19 has adversely affected, and in the future it or other epidemics, pandemics or outbreaks may adversely affect the Corporation's operations, including the portfolio of equity securities. This is or may be due to closures or restrictions requested or mandated by governmental authorities, disruption to supply chains and workforce, reduction of demand for products and services, credit losses when customers and other counterparties fail to satisfy their obligations to the Corporation, and volatility in global equity securities markets, among other factors. Most of these risks are shared with all businesses. The comprehensive effects of the pandemic on the Corporation's income and balance sheet, including the impact of litigation and regulatory or legislative actions, cannot be reasonably estimated at this time.

The Corporation and its subsidiaries have been named as defendants in litigation or as respondent in arbitration in the ordinary course of conducting their insurance and reinsurance business. These lawsuits generally seek to establish liability under insurance or reinsurance contracts issued by the Corporation, and occasionally seek damages. The Corporation is also indirectly involved in coverage litigation. In those cases, plaintiffs seek coverage for their liabilities under insurance policies from insurance companies reinsured by the Corporation or one of its subsidiaries. In the judgment of management, none of these cases, individually or collectively, is likely to result in judgments for an amount which, net of losses and loss adjustment expense liabilities previously established, and net of applicable reinsurance, would be material to the Corporation's statutory surplus.

The Corporation and certain of its subsidiaries are also involved in other kinds of legal actions, some of which assert or may assert claims, or seek to impose fines and penalties, in substantial amounts and are described below.

GRAG Lawsuits:

On June 26, 2007, GRAG adopted a resolution to transfer the minority shareholders' shares in GRAG (approximately 4.8%) to the Corporation for a specified cash compensation (otherwise known as a "squeeze out"). On or about February 12, 2009, the German court registered the transfer resolution which has resulted in the Corporation acquiring the 100% ownership interest in GRAG. Since then, certain minority shareholders have filed challenges to the proposed cash compensation, and the Corporation has responded that such objections have no merit.

The Corporation has established reserves for certain of the legal proceedings discussed above where it has concluded that the likelihood of an unfavorable outcome is probable, and the amount of the loss can be reasonably estimated. For other legal proceedings discussed above, either the Corporation has determined that an unfavorable outcome is reasonably possible, but it is unable to estimate a range of possible losses or it is unable to predict the outcome of the matter. Management believes that any liability to the Corporation that may arise as a result of current pending civil litigation, including the matters discussed above, will not have a material effect on the Corporation's financial condition or results of operations.

B. Troubled Debt Restructuring for Debtors - None

C. Other Disclosures

- Effective January 1, 2005, with the permission of their domestic insurance regulators, the Corporation and certain of its North American based property and casualty affiliates entered into a loss portfolio reinsurance contract (the "loss portfolio") and a quota share reinsurance contract (the "quota share") with two other affiliates, National Indemnity Company, and Columbia Insurance Company. The loss portfolio provides for a 50% reinsurance cover on existing net losses as of December 31, 2004, subject to an overall aggregate limit of \$11,155 million. The amount of net reserves ceded by the Corporation on January 1, 2005 was \$5,671 million (including \$525 million of retroactive reinsurance reserves). Consideration was equal to the amount of net statutory reserves and was reported by the Corporation as ceded earned premium in 2005 for the lines of business of the underlying reserves ceded. There was no surplus gain from this retroactive transaction with affiliates and was accounted for as reinsurance. The quota share provides for a 50% reinsurance cover on net losses occurring on or after January 1, 2005. At December 31, 2022 the Corporation reported \$1,420 million of ceded outstanding losses on the loss portfolio, and \$5,914 million of ceded outstanding losses on the quota share. The Corporation reported ceded earned premium in calendar year 2022 of \$1,945 million to the quota share contract.

NOTES TO FINANCIAL STATEMENTS

2. Concurrently with the loss portfolio transfer and quota share agreements, Berkshire and the Corporation entered into a Net Worth Maintenance Agreement whereby Berkshire guarantees maintenance of statutory capital sufficient to support risks and to meet capital adequacy ratios of General Re and its subsidiaries, including the Corporation.

F. Subprime Mortgage Related Exposure

During 2022, the Corporation disposed of the only subprime security carried in its portfolio at December 31, 2021. The transaction resulted in a \$589 realized gain. There were no OTTI write-downs during the year prior to the disposal.

The Corporation has no direct subprime mortgage related risk exposure due to investments in subprime mortgage loans or other investments and has no underwriting exposure to subprime mortgage related risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

The Corporation's exposure to subprime mortgage-related risk is limited to investments within the fixed income investment portfolio which may contain securities collateralized by mortgages that have characteristics of subprime lending. Such characteristics include an interest rate above prime to borrowers who do not qualify for prime rate loans, borrowers with low credit ratings (FICO scores), unconventionally high initial loan-to-value ratios, and borrowers with less than conventional documentation of their income and/or net assets. The Corporation minimizes subprime mortgage-related risk within the fixed income investment portfolio by holding securities which carry higher credit ratings and by monitoring the underlying collateral performance on an ongoing basis.

24. RETROSPECTIVELY RATED CONTRACTS AND CONTRACTS SUBJECT TO REDETERMINATION

Accrued retrospective premiums reported in Line 15.3 of the assets schedule have been determined based upon loss experience on business subject to such experience rating adjustments. Accrued retrospectively rated premiums, including all of those relating to IBNR, have been determined by or allocated to individual accounts of reinsured companies.

The predominant business of the Corporation is assumed reinsurance. The Corporation has non-admitted \$3 million of the accrued retrospective premium balance on line 15.3 associated with reinsured's non-admitted agent's balances or uncollected premium(s) on line 15.1 or 15.2.

The Corporation records accrued additional net assumed retrospective premiums through written premium.

25. CHANGE IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSE

Reserves as of December 31, 2021 were \$7,582 million. As of December 31, 2022, \$1,011 million has been paid, in the year-to-date period for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years, totaled \$5,665 million. Therefore, excluding change in unrealized foreign exchange of \$(587) million, primarily in the international line, there has been \$319 million of year-to-date favorable development, primarily in the Corporation's non-proportional reinsurance lines. Original estimates are increased or decreased as additional information becomes known regarding individual claims.

In 2021, prior years had \$245 million of favorable development.

33. ASBESTOS AND ENVIRONMENTAL RESERVES

The Corporation has exposure to both asbestos and environmental ("A&E") losses, principally arising from the reinsurance of general liability policies. The Corporation has established related loss reserves based on management's best estimate of future claim and claim expenses including incurred but not reported claims ("IBNR") and reinsurance recoveries which are expected to develop over the next several decades.

The Corporation continues to monitor evolving case law and its effect on asbestos and environmental claims. Changing government regulations and legislation, newly identified toxins, newly reported claims, new theories of liability, new contract interpretations, and other factors could affect future claim development. Effective July 1, 2020, the Corporation entered into a new retroactive reinsurance agreement with an affiliate, that ceded the Corporation's remaining net reserves of \$1,466 million, excluding risks in Canada, for no gain or loss.

The Corporation's reserves for A&E are established based on three components: known claims, development on known claims and IBNR. The Corporation's estimate for IBNR is based on the relationship between historical payments trending into reduced levels of future payments over the forecast period. This estimate is less reliable than the estimated liability for reported claims.

Annual Statement for the year 2022 of the GENERAL REINSURANCE CORPORATION

SCHEDULE P INTERROGATORIES

1. The following questions relate to yet-to-be-issued Extended Reporting Endorsements (EREs) arising from Death, Disability, or Retirement (DDR) provisions in Medical Professional Liability Claims Made insurance policies. EREs provided for reasons other than DDR are not to be included.
- 1.1 Does the company issue Medical Professional Liability Claims Made insurance policies that provide tail (also known as an extended reporting endorsement, or "ERE") benefits in the event of Death, Disability, or Retirement (DDR) at a reduced charge or at no additional cost? Yes [] No [X]
 If the answer to question 1.1 is "no", leave the following questions blank. If the answer to question 1.1 is "yes", please answer the following questions:
- 1.2 What is the total amount of the reserve for that provision (DDR Reserve), as reported, explicitly or not, elsewhere in this statement (in dollars)? \$
- 1.3 Does the company report any DDR reserve as Unearned Premium Reserve per SSAP #65? Yes [] No []
- 1.4 Does the company report any DDR reserve as loss or loss adjustment expense reserve? Yes [] No []
- 1.5 If the company reports DDR reserve as Unearned Premium Reserve, does that amount match the figure on the Underwriting and Investment Exhibit, Part 1A - Recapitulation of all Premiums (Page 7) Column 2, Lines 11.1 plus 11.2? Yes [] No [] N/A []
- 1.6 If the company reports DDR reserve as loss or loss adjustment expense reserve, please complete the following table corresponding to where these reserves are reported in Schedule P:

Years in Which Premiums Were Earned and Losses Were Incurred		DDR Reserve Included in Schedule P, Part 1F, Medical Professional Liability Column 24: Total Net Losses and Expenses Unpaid

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as "Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement? Yes [X] No []
3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7, below. Are they so reported in this Statement? Yes [X] No []
4. Do any lines in Schedule P include reserves that are reported gross of any discount to present value of future payments, and that are reported net of such discounts on Page 10? Yes [] No [X]
- If yes, proper disclosure must be made in the Notes to Financial Statements, as specified in the Instructions. Also, the discounts must be reported in Schedule P - Part 1, Columns 32 and 33. Schedule P must be completed gross of non-tabular discounting. Work papers relating to discount calculations must be available for examination upon request.
 Discounting is allowed only if expressly permitted by the state insurance department to which this Annual Statement is being filed.
5. What were the net premiums in force at the end of the year for:
 (in thousands of dollars)
- 5.1 Fidelity
- 5.2 Surety
6. Claim count information is reported per claim or per claimant (Indicate which)
 If not the same in all years, explain in Interrogatory 7.
- 7.1 The information provided in Schedule P will be used by many persons to estimate the adequacy of the current loss and expense reserves, among other things. Are there any especially significant events, coverage, retention or accounting changes that have occurred that must be considered when making such analyses? Yes [X] No []
- 7.2 (An extended statement may be attached.)
 See attached

Schedule P Interrogatories 7.2 Attachment

A. The Reinsurance lines in the various Schedule P parts should not be used in estimating current reserve level adequacy. Past histories may not be indicative of future development for the following reasons:

- 1) The Corporation's mix of business changed over time.
- 2) Commutations of assumed and/or ceded reinsurance contracts can distort development for the calendar year in which the commutation(s) take place.
- 3) A portion of the Corporation's business is retrospectively rated, where development on loss reserves is partially offset by additional premium or reduced commission.

B. Claim count data has not been provided in Schedule P because meaningful information is not available. For example, the Corporation does not receive claim count data from its cedants for those proportional type claims that are reported in bulk or via bordereau.

C. As indicated above, information on individual assumed claims is not consistently available to a reinsurer. As such, adjusting and other expenses paid are distributed to each annual statement line and accident year based upon a pre-existing historically accepted formula whereby, the majority of expenses are charged to the most recent accident year and pro rata to the other accident years.

D. The Corporation's reserves, for reserves assumed in currencies other than US dollars, include an unrealized foreign exchange adjustment to the reporting date spot rate values as a direct adjustment to reserves and surplus, as such an equal adjustment to paid loss and loss adjustment expenses is needed to maintain ultimate incurred values. Current year values include net foreign exchange adjustment of \$(585) million therefore, an adjustment of \$585 million was added to paid loss and loss adjustment expenses. Unrealized foreign exchange adjustments were not previously included in reserves, but rather as a separate foreign exchange gain (loss) on the balance sheet. Future years will include adjustment(s) that are equal to the year-to-date unrealized foreign exchange change.

Re: Question 1 - As a professional reinsurer, the Corporation does not issue medical professional liability claims made policies that provide tail benefits but does assume risk regarding these types of policies. The Corporation has reserved for DDR benefits for client issued endorsements for this coverage type, as a component of loss reserve included in column 24 of Schedule P-Part O (Non-proportional Assumed Liability) totaling \$187 thousand. The Corporation does not reserve for yet-to-be-issued Extended Reporting Endorsements (ERE).

Effective July 1, 2021, with the approval of the DE DOI, the Corporation entered into a retroactive reinsurance agreement ("GRAG LPT") with an affiliate, General Reinsurance AG, which results in a cession of 90% of aggregate ultimate net losses as of June 30, 2021, net of existing reinsurance, inclusive of all loss and loss adjustment expenses for underwriting years 2020 and prior totaling \$5,696 million, with an aggregate limit of \$9,967 million. Payment was equal to the reserves ceded resulting in no gain or loss.

Concurrently, the reserves assumed under the GRAG LPT were retroceded to the existing 50% quota share agreement with affiliates, National Indemnity Company, and Columbia Insurance Company, totaling \$2,848 million for no gain or loss. (See Note 10 B for details)

Effective July 1, 2020, with the approval of the DE DOI, the Corporation entered into a retroactive reinsurance agreement with an affiliate, National Indemnity Company, which ceded 100% of net Asbestos and Environmental reserves (excluding Canada exposures) of \$1,466 million, with an aggregate limit of \$4,401 million, with payment of \$1,466 million resulting in no gain or loss.

In conformity with SSAP 62R, the loss portfolio payments (the "consideration") were characterized as premium and resulted in a distortion to the development of previously incurred losses. Had the Corporation recorded the consideration as paid loss and loss adjustment expenses, offsetting the reserve movements in the corresponding lines of business and accident years then Schedule P Part 2 would reflect the following one-year and two-year development.
